following amendments and remarks is respectfully requested.

AMENDMENT

Please amend claims 1 and 11 as follows.

Subcl 1. (Amended) A method for transmitting communication between first and second communication units over a plurality of radio frequencies, the method comprising:

setting the first and second communication units to respectively transmit and receive communication over a first radio frequency during a first time frame;

A selecting an initial frequency by a voltage controlled oscillator of the first and second communication units and multiplying the initial frequency by a frequency multiplier to select a second radio frequency during the first time frame; and

setting the first and second communication units to respectively receive and transmit communication over the second radio frequency during a second time frame.

Subcl 11. (Amended) An apparatus, comprising:

a first and second communication unit for communication therebetween over a plurality of radio frequencies, the first and second communication units each including:

A2
cont a controller adapted to set the first and second communication units to respectively transmit and receive communication over a first radio frequency during a first time frame, select an initial frequency by a voltage controlled oscillator of the first and second communication units and

A2
Concl

multiplying the initial frequency by a frequency multiplier to select a second radio frequency during the first time frame, and set the first and second communication units to respectively receive and transmit communication over the second radio frequency during a second time frame.
